

Kufre Usen Antia

APM Student of the Year 2026

Garth heads, Melbourne Street, Newcastle NE1 2JE

COREN Registered Engineer | APM Member | CIOB Committee Member

07721023735 | kufreusenantia@outlook.com | www.linkedin.com/in/kufreantia | www.kufreusenantia.com

PROFILE

Civil engineer with ten years of experience spanning major highway infrastructure and building projects, bridging hands-on site delivery with data-driven project controls. Holds an MSc in Construction Project Management with BIM registered with COREN and an active member of CIOB and APM professional networks. Known for earning the confidence of clients and site teams alike, turning emerging digital methods into practical gains in programme certainty and delivery quality and as a dedicated, resourceful and highly engaged engineer.

SKILLS

Construction Delivery: Site operations, subcontractor supervision and coordination, quality assurance (RAMS, ITP, NCR), dimensional control, setting out, live traffic management, health and safety implementation, toolbox talks

Project Controls & Planning: Scheduling (MS Project, TILOS, Primavera P6), Last Planner System, critical path analysis, earned value management, cost-value reconciliation (CVR), progress monitoring, variance analysis, RIB iTWO

Digital Construction & BIM: BIM (ISO 19650), Revit, Navisworks, BEXEL, Virtual Reality, 4D/5D simulation, BCF workflows

Design & Documentation: AutoCAD, Revit, drawing review, technical queries (TQ/RFI), change control, site documentation, handover documentation

Data & Reporting: Excel (advanced), Power BI (developing)

Contracts & Commercial: FIDIC Silver Book, NEC4, interim statements, dispute resolution, insurance claims, quantity surveying.

EXPERIENCE

Construction Engineer | Various Contractors via Multiple Agencies

Mar 2026 – Present

- Supported on-site construction tasks across multiple projects, ensuring safe and efficient execution including Centurion Chase Estate Development with Bellway via Daniel Owens Recruitment, St. Jame Park Hospitality Retrofit with Robertson through Apex recruitment.
- Developed an practical understanding and experience on HSE and CDM regulations.
- Assisted with material handling, site preparation, and equipment operation under site supervision.
- Contributed to maintaining site cleanliness, organization, and safety compliance.
- Adapted to varied site needs, gaining exposure across different contractors and project types

Project Manager | Northumbria University (MSc Advance Practice)

Jan. 2025 – Apr. 2025

Project: Design of Sensory Garden in Nuns Moor Park. | **Client:** Build Planent Zero Ltd | **Tools:** Teams, MS Project, BEXEL, Navisworks, VREX | **Skills:** 3D Planning, 4D/5D scheduling, BIM, stakeholder engagement, innovation, communication, resilience.

- Led the digital coordination and project planning for a modular net-zero sensory garden project in Nuns Moor Park, Newcastle, working as a within a consultancy team at J Arthur Consult as part of my MSc studies.
- Supported the design planning and coordination for the rehabilitation of brownfield site into a sustainable NetZero, modular sensory garden.
- Applied structured 4D/5D resource-loaded scheduling and 3D modularization sequencing using Navisworks, BEXEL and MS projects to a public infrastructure scheme.
- Enhanced stakeholder assurance, building confidence and trust through frequent communication, structured technical reporting and innovation, deploying virtual reality using VREX for improved clarity at review meetings, reducing design iteration cycles and accelerating the pace of design delivery.

Project: Sustainable Reconstruction of 376 km Abuja – Kano Highway using Recycled Asphalt | **Project Value:** £1.5B | **Tools:** AutoCad, iTwo, TILOS, Excel, SAP | **FIDIC Contract** | **Self Delivery** | **Skills:** Project monitoring & control, Stakeholder management, scheduling, cost estimation, quantity surveying, technical reporting, systems thinking, dDispute resolution.

- Supported the planning and delivery of more than 250 culverts and drainage structures using precast components, undertaking site investigations and coordinating design changes with internal and external design teams.
- Periodically performed civil engineering design calculations supporting construction activities, including cement spread-rate calculations for soil stabilisation based on moisture content, soil shear stress calculations and other engineering assessments.
- Contributed to the preparation and implementation of Method Statements and Inspection & Test Plans (ITPs) to support safe and compliant construction delivery.
- Maintained stakeholder assurance by supporting inspections and site visits with client representatives and funding organisations, verifying material quality and construction compliance.
- Periodically analysed plant and equipment productivity by monitoring truck cycle times, haul distances between borrow pits, site yards and work fronts, and tracking chisel consumption for soil stabilisation and cold milling operations to improve operational efficiency.
- Supported the preparation and submission of handover documentations, ensuring compliance with contractual requirement.
- Supported tender feasibility studies and shared technical innovations across regional projects to contribute to business development and continuous improvement initiatives.
- Used Spreadsheets, RIB iTWO to produce monthly cost reports, cost-value reconciliations (CVRs), earned value tracking and variance trend analyses, developing practical grounding in the cost reporting and forecasting workflows central to project controls.
- Developed short-term look-ahead schedules from TILOS master plans using Last Planner System principles, integrating work-front supervisors into weekly planning cycles and contributing to a 30% improvement in Planned Percentage Complete.
- Monitored critical path activities, identified slippage trends and supported corrective resequencing; produced weekly and monthly management reports and facilitated progress reviews with the project and client teams.
- Designed and implemented a multi-workbook Excel tracking system linking daily production data to iTWO MKSIV outputs, automating discrepancy identification and improving progress data quality, while revealing the limitations of manual reconciliation that motivated my pursuit of digital controls in postgraduate study.

Achievement

- Supported £2.7m insurance claims recovery through detailed root cause analysis of subgrade failure, producing technical reports. Cost estimation and substantiation for loss adjusters.
- Resolved commercial disputes in unsigned interim statement acting as a mediator between engineer representative, sub-contractors and QS team, conducting technical reviews and providing progress evidence, unlocking £1.1 million in cash flow
- Improved Planned Percent complete by 30% including work front supervisors in scheduling activities during weekly site meeting.

Civil Site Engineer | Xantias Construction Limited

June 2016 to June 2019

- Supported engineering activities through design and construction phases across diverse projects, including drainage infrastructure, educational facilities, hospitality, and residential expansions.
- Carried out setting-out of excavation, drainage, and structural elements using dumpy level.
- Supervised daily site operations, ensuring compliance with design drawings, specifications, and quality standards.
- Coordinated with designers and consultants to resolve technical queries and maintain constructability.
- Managed site documentation including daily progress reports, inspection records, and material tracking logs.
- Conducted quality inspections and ensured corrective actions were implemented where necessary.
- Supported safe working practices and ensured compliance with project health and safety procedures.

EDUCATION & QUALIFICATIONS

MSc Construction Project Management With BIM - Northumbria University **Jan 2026**
Project planning and scheduling | Project control | Lean Construction | Integrated Project Delivery | BIM | ISO 19650 | NEC Contracts | People Management

BEng Civil Engineering - University of Uyo **May 2016**
Highway Engineering | Engineering Contract & Law | Engineering Survey and Photogrammetry | Quantity Surveying & Estimating

CPD & CERTIFICATIONS

- CITB Health and Safety (2025)
- Fire Marshal (2024)
- First Aid At Work (2024)
- CDM - Institution of Civil Engineers
- CSCS Card – Green & White

PROFESSIONAL MEMBERSHIP

CIOB Northeast Committee Member | Chartered Institute of Building **Oct 2025 to Present**

- Represent the CIOB Tomorrow's Leaders network across the Northeast, promoting professional development and engagement among students and professionals.
- Support peers in linking academic learning with professional practice, fostering collaboration between universities and industry.
- Serve on the CIOB Northeast Regional Hub Committee, contributing to strategy discussions and regional engagement planning.

APM Student Member | Association for Project Management

- Recognised as the APM Student of the year for applying acquired knowledge to identify challenges delivery projects to address identified challenges with sustainable benefits.
- Managed the delivery of the Bridge the Gap Initiative through full life cycle managing changes while ensuring the realisation of set benefits, recognised as a finalist at the APM project Management Challenge 2025, commended for governance and lifecycle management.
- Founded Northumbria Construct, a student society focused on bridging the gap between industry and academia through story telling- a result of the Bridge the Gap Initiative.
- Engaged in CPDs, notably, an APM Oxford Styled debate on Stakeholder Engagement, and encouraging first time speakers to participate on stage in the second motion, replicating the event under Northumbria Construct, preparing and submitting a feedback report to Northumbria University as well as a debrief with the CIOB, resulting in a 25% improvement in student participation at CIOB events.

Founder | Northumbria Construct **Nov 2024 - Present**

- Organised and delivered seminars, webinars, site visits and trainings for students and early career professional through institutional networks.
- Founded an hybrid societies for students and early career professionals to bridge the transition from academia to industry by encouraging participations.

Registered Engineer | Council for the Regulation of Engineering in Nigeria (COREN) **Dec 2023**

AWARDS & RECOGNITION

Student of the Year **2026**

Association for Project Management (APM) Northeast regional network

Award of Recognition **Dec 2025**

Nigerian Institution of Civil Engineer University of Uyo - celebrating a rare blend of initiative, impact and intentionality.

Outstanding Student Commendation (Summer Congregation 2025) **Dec 2025**

Northumbria University — for dedication to help shape the future of the construction industry, noting inspirational leadership and tenacity.

Outstanding Student Commendation (Winter Congregation 2025) **Jul 2025**

Northumbria University — for developing Northumbria Construct

APM Project Management Challenge — Northeast Regional Finalist **May 2025**

APM Project Management Challenge 2025
